

AMERICAN FIRE GLASS™

Fire Glass & Burners

Fire Glass | Fire Rocks | DIY Fire Kits | Burners | Accessories

½" FIRE GLASS COLLECTION

One of our most popular products, our ½" Fire Glass is made from premium grade, high quality, tempered safety glass. When used properly in your fireplace or fire pit, it will not melt, degrade, create soot or ash, and will not release toxic fumes into our environment. The wide range of colors allow you to use your creativity to mix and match to create artistic and elegant fire effects. Our premium reflective Fire Glass is unique, as it provides a more intense and vibrant flame, as the reflective mirror-like finish picks up the ambient lighting in such a way that the glimmer is more intense and the reflective qualities are mesmerizing.

1/4" FIRE GLASS COLLECTION

Just like our larger Fire Glass, our 1/4" collection is made from premium grade, high quality, tempered safety glass. When used properly in your fireplace or fire pit, it will not melt, degrade, create soot or ash, and will not release toxic fumes into our environment. The wide range of colors allow you to use your creativity to mix and match to create artistic and elegant fire effects. Our premium reflective Fire Glass is unique, as it provides a more intense and vibrant flame, as the reflective mirror-like finish picks up the ambient lighting in such a way that the glimmer is more intense and the reflective qualities are mesmerizing.

FIRE BEADS

Fire Beads are different than Fire Glass in that they are not pieces of glass, but instead, smooth, rounded beads and their smooth and polished look creates a very relaxing, serene environment. Perfect for your fireplace or fire pit, Fire Beads are fairly uniform in shape and size, at about $\frac{1}{2}$ " - $\frac{3}{4}$ " each. Fire Beads are impressive with an elegant, luminous glow and fluid, reflective qualities, that add a modern look to your indoor or outdoor décor. With many different shades available, ranging from light to dark, pairing them together can create an entirely new custom look. Several Fire Beads are also available with a subtle, iridescent luster reflective enhancement.

ZIRCON FIRE GLASS

Our Zircon Fire Glass is made using high quality decorative colored glass, and molding it into rough "Diamond" shapes. The glass is then polished, with the end result a beautiful, gem-like smooth finish. Each piece of Zircon Fire Glass is unique and eye-catching, helping design professionals and homeowners create tasteful yet exquisite designs for their commercial and residential projects. Zircon Fire Glass can be used in both indoor and outdoor applications. Currently, we stock eight colors of Zircon Fire Glass with six of those colors having a subtle, iridescent luster reflective enhancement.

ECO GLASS

AFG Eco Glass is a unique and “green” product made from pre-consumer recycled glass products. The only difference is that the edges of the sheets are used rather than the sheet itself. The glass is melted and dyed to create beautiful, irregular shaped glass beads in a myriad of colors. Eco Glass can virtually last a lifetime. Another advantage of our Eco Glass is that it does not emit any toxic fumes into our environment, or give out any nasty soot, ash, or smoke, and cleaning and maintaining fire glass is a breeze.

RECYCLED FIRE PIT GLASS

Recycled Fire Pit Glass is created using raw post-consumer glass, making it the “greenest” glass we provide. It starts by being selected for color, melted, additional color added, cooled and processed. We then put our recycled glass through additional processes to clean, and minimize any small unusable fragments prior to packaging, leaving them approximately ½" - 1" in size. We presently stock eight colors, and recommend using our Recycled Fire Pit Glass for outdoor fire features, water features, garden mulch, landscape design, and decorative concrete applications. Fire Pit Glass is not recommended for use in indoor or enclosed masonry fire box applications.

LITE STONE BALLS

From amid the burning wreckage and treasures of the old world, Lite Stone Balls boast a blend of modern and old world charm with minimalist design to create a neat uncluttered look to your gas fire pit and fireplace. Utilizing current ceramic technologies, Lite Stone Balls are ideal for indoor and outdoor environments. Our Lite Stone Balls get their color from an environmentally friendly ceramic stain that is absorbed into the porous fireproof material. Extremely durable, our Lite Stone Balls are freeze tested & fire approved. They are clean burning with no smoke, ash, or harmful fumes. The Lite Stone Ball sets are available in various quantities where you can choose the one that best fits your fire feature and style.

Our Lite Stone Balls are available in sets of all uniform 4" balls and mixed sets of 2", 4", and 6" balls. Both set types are offered in 8 different colors and 2 designer mixed color sets.

LITE STONES

Those who are ready for an upgrade of their fireplace or fire pit must consider our brand new Lite Stones as the perfect alternative. Lite Stones have an old world charm, while providing a minimalistic design and create a neat and uncluttered look in fireplaces and fire pits. Lite Stones also add color to the décor, and liven up your ambience. Available in 8 beautiful colors, you will certainly find one or more colors to suit your existing color scheme and décor. Lite Stones get their color from an environmentally friendly ceramic stain that gets absorbed into the porous material, so, these fire stones age gradually, and do not lose their color to heat and elements.

LAVA ROCKS

AFG Lava Rocks are primarily used as filler, in combination with our more decorative Fire Glass, but can be used alone for a more rustic, natural look if desired. Available in four sizes, our Lava Rocks retain heat better than logs making them much more energy efficient and cost effective. The biggest advantage is that our Lava Rocks are less expensive than Fire Glass when filling a deep fire pit, and you can then top it off with your choice of Fire Glass, or just leave it natural.

SMALL - ¼" - ½"

MEDIUM - ½" - 1"

LARGE - 1" - 2"

XXL - 4"-6"

TUMBLLED LAVA STONES

Tumbled Lava Stones are a modern variant of the traditional lava rock. They are a smooth and irregularly shaped stone, with a speckled finish. These Lava Stones are safe for use in fireplaces and fire pits. Available in three sizes, our Tumbled Lava Stones retain heat much better than logs, making them more energy efficient and cost effective. Tumbled Lava Stones look great as an additional accent to Fire Glass, and also look great throughout any fire feature.

SMALL - ½" - 1"

MEDIUM - 1" - 2"

LARGE - 2" - 3"

FIRE BOWLS

Fire Bowls are a decorative accessory that can boost your outdoor décor in an elegant and stylish way. AFG has put together a great collection of Fire Bowls to blend with a large variety of décor styles. All of our Fire Bowls are ready to use. Simply hook up to a gas supply, spread a layer of colorful and radiant Fire Glass and get ready to enjoy an amazing fire display. We have both natural gas and propane fueled Fire Bowls in our collection. So, check out our amazing collection of Fire Bowls, and you will certainly find something to suit your style, needs and budget. Every Fire Bowl includes a 12" stainless steel fire pit ring, quiet flex stainless gas hose, and fittings.

FIREPLACE BURNER COLLECTION

To get the best fire experience, you need the best quality burner in your fireplace. Keeping this in mind, AFG has put together a comprehensive collection of burners for fireplaces and you can choose the right one based on the type, size of your fire feature, and your style. All of our burners are manufactured using high quality .304 stainless steel, designed to last and serve your fireplace for many years. These fireplace burners are only for use in fully vented indoor natural gas applications, easy to install, and perfect for simple installations.

*Includes Flex Line Kit

PARAMOUNT PAN BURNERS

If you want to give a modern twist to your fireplace, with beautifully radiant Fire Glass, then our Paramount Burners are the right choice for you. These burners have an ergonomic shape with angled sides, and look as classy as they are efficient. These burners have a clean and sophisticated look that can enhance the aesthetics of any fireplace. Paramount burners are available in two different sizes and either oil rubbed bronze or stainless steel finishes.

OIL RUBBED BRONZE

STAINLESS STEEL

CONTEMPORARY PAN BURNERS

For a more simplistic look, we offer our Stainless Steel Pan Burners. If you are looking to give a modern transformation to your fireplace, then these contemporary fireplace pan burners are the perfect answer. Our Stainless Steel Pan Burners are available in two different sizes, 22" and 30", so, you can choose the right size depending on the width of your fireplace. You also get a choice between two different shapes, rectangular or oval.

OVAL

RECTANGULAR

FIREPLACE H-BURNERS

NATURAL GAS

AFG H-Burners are designed specifically for use with Fire Glass and Fire Rocks. The dual rows provide the burner optimal flame for Fire Rocks or Fire Glass, and the ergonomic design creates a flame that is large, and spreads evenly across the entire fireplace. AFG offers H-burners in a variety of sizes that we manufacture using top quality .304 stainless steel. It is the perfect candidate for a simple installation. You will just need to install the burner and optional ignition kit (sold separately), and your fireplace will be ready for an amazing fire display. The holes are drilled and not punched so you will not get the constant whistling noise often found with cheap imitation burners.

FIRE PIT RINGS

If you are looking to build a new fire pit or give a makeover to your existing one with colorful Fire Glass or Fire Rocks, then our Fire Pit Rings are the right choice for you. AFG Fire Pit Rings feature a cross bar single, double, or triple ring design, that allows gas to circulate better giving you a bigger, more realistic "camp fire" like flame. AFG Fire Pit Rings are made using only high quality .304 stainless steel, which gives it immense strength and resistance to rusting. Our Fire Pit Rings are available in a wide variety of sizes, so you can choose the one that best fits your fire pit. While choosing, you will need to make sure that the Fire Pit Ring is at least 6" smaller than the interior diameter of your fire pit.

ROUND DROP-IN PANS

AFG Round Drop-In Pans are easy to install, featuring a 2 ½" depth, 1 ¼" support rim, ½" nipple, and drilled weep holes. These weep holes allow proper drainage of water. Manufactured using high quality .304 stainless steel, these pans can withstand high temperatures and exposure to the elements. You can use our drop-in Fire Pit Pans in both propane and natural gas applications. Drop-in and Flat Pans do not include Fire Pit Rings. Every pan includes a removable plate for ignition upgrade options.

Note: Drop-In Pans have an additional 1 ¼" Support Rim and are 2" deep (Round Drop-In Pans are 2 ½" deep)

*Fire Pit Rings Sold Separately

ROUND FLAT PANS

Our round flat pans are manufactured using high quality .304 stainless steel, and are sturdy, weather resistant, and durable, making them perfect for outdoor fire pits. Designed for a concealed look when used with stack stone, concrete block, precast bowls, tile or many other fire pit components. Pre-drilled weep holes allow proper drainage of water. Available in a large variety of sizes, we have the right pan for your fire pit. Drop-in and Flat Pans do not include Fire Pit Rings. Every pan includes a removable plate for ignition upgrade options.

*Fire Pit Rings Sold Separately

RECTANGULAR DROP-IN PANS

AFG Rectangular Drop-in Pans are easy to install, featuring a 2" depth, 1 1/4" support rim, 1/2" nipple, and drilled weep holes. These weep holes allow proper drainage of water. Manufactured using high quality .304 stainless steel, these pans can withstand high temperatures and exposure to the elements. You can use our Drop-in Fire Pit Pans in both propane and natural gas applications. Every pan includes a removable plate for ignition upgrade options.

SMART IGNITION TECHNOLOGY

The S.I.T. System (Smart Ignition Technology) configuration provides the highest level of intelligence and safety for Natural Gas or Propane outdoor fire features. With the flip of a switch, outdoor fire features are turned on or off, and are constantly monitored for the presence of fire. If fire is not detected, the S.I.T. System automatically makes multiple attempts to re-light, and in the event of the fire feature not properly re-lighting, the system automatically closes the internal gas valve as a safety precaution.

FIRE BOWLS

INTEGRITY

The logo for American Fire Glass features a stylized flame icon above the company name. The flame is composed of three curved, overlapping shapes that suggest movement and heat. Below the flame, the words "AMERICAN" and "FIRE GLASS" are written in a serif font, with "AMERICAN" on the top line and "FIRE GLASS" on the bottom line. A small trademark symbol (TM) is located to the right of "GLASS".
