THE OUTDOOR GREATROOM COMPANY

THE OUTDOOR GREATROOM COMPANY

table of contents

about

WHO WE ARE
Located in the heart of Minnesota, The Outdoor GreatRoom Company™ (OGC) manufactures unique, upscale products with design appeal for outdoor living spaces. Products include gas fire pit tables, gas fire burners, pergolas, outdoor kitchen islands, outdoor gas fireplaces, outdoor patio furniture, and accessories.

WHAT WE DO
The team behind The Outdoor GreatRoom Company™ was the first to enter into the gas fire pit category and with that expertise we can offer over 40 gas fire pit products plus gas fire burners to turn any outdoor space into an oasis! Most of our fire pits are made in the USA and are UL & CE listed for safety.

OUR PROMISE
Let the Outdoor GreatRoom Company help to define your outdoor experience. We set the trends outside as your one-stop-shop for safe products, reliable and friendly service, and innovative technology. From concept to design to delivery, we will ensure your style doesn't stop at the door. Distinctive products for a distinctive lifestyle. Bring home outside.

OUR MISSION
To bring family and friends together by redefining the home living experience through innovative products and people.

HISTORY
In 1975, Dan and Ron Shimek had an inspiration for indoor gas fireplaces that changed an industry and became the foundation of Heat-N-Glo®. Brothers Steve and Gerry joined them and the rest (including over 50 patents) is history. But the Shimeks were never ones to dwell on the past. That inspiration led Dan to launch the first company of its kind in 2003: The Outdoor GreatRoom Company™ – a company dedicated to an exciting new concept "the outdoor greatroom."

BRING HOME OUTSIDE.

The "outdoor greatroom" came from the idea that homeowners should enjoy their outdoor space as much as their indoor living space and that the comforts of indoors were to be enjoyed outdoors. This idea has been the foundation of our company and our inspiration to provide innovative products to those who like to entertain and live life outside.

The Outdoor GreatRoom Company™ is your one-stop-shop to create your dream outdoor room.

what is an outdoor greatroom?

why ogc?

OGC is focused on bringing the best and safest products to the market. That's why we have a team with over 10 years experience manufacturing products in the outdoor living category, and we continue to introduce new and innovative products year after year.

- One stop shop for quality, durable outdoor living products
- Innovative technology
- Trend setting design
- Our team has over 40 years experience in the hearth industry
- UL listed products for safety
- Family owned, family values

GAS FIRE PIT TABLES

gas fire pit tables

Light up the night and add ambiance to your outdoor space with beautiful gas fire pit tables. These glowing fires will become the place to gather with family and friends for years to come. Find a warm, cozy fire for every season.

CF-2424-DIY

Crystal Fire™ Burners are made from high quality, Stainless Steel (commercial grade #304) and include tempered fire glass gems and ignition controls. All standard burners are UL listed for safety and quality. They work with our line of fire pit tables or can be purchased separately for custom-built fire pits and projects.

Crystal Fire™ Burners can run for 8-16 hours using a 20 lb. propane tank or can be hooked up to a natural gas line. Adjust the flame height to your desired setting and enjoy. With just the push of a button, a beautiful clean-burning fire appears atop a bed of tempered fire glass gems.

- 1 year warranty on ignition
- Limited lifetime warranty on Stainless Steel
- Electronic battery operated ignition
- Adjustable gas valve for flame height
- Comes out of the box set up for liquid propane (LP)
- Can be purchased individually to be used for custom-built projects
- Glass guard recommended to enhance flame
- UL listed
- Can be color coated in 1 of 4 custom colors (see pg. 39)
- Includes: LP hose and regulator, metal flex hose, ball valve, push button sparker system, natural gas orifice, tempered fire glass gems
- Control panel with gas valve sold separately (see pg. 35)

- Can convert to LP (DIY-LPK)
- Customer must buy separately - Block Adhesive- LOCTITE® - PL®500 Landscape Construction Adhesive or equivalent.
- Hudson Stone™ units provided by Anchor Block
direct spark ignition system

The Direct Spark Ignition System is an automatic safety ignition system with flame sensing and an automatic valve. The system is controlled by a module that sends a spark signal to the electrode (igniter), opens the gas valve and then the gas ignites. Once lit, the flame recognition senses the flame, and the electrode stops sparking. If the conditions are windy and the flame blows away from the sensor, the system will try to reignite. If the burner is unable to reignite after 12 seconds, the system will enter safety shut down mode and close the gas supply to the burner. As with all Crystal Fire™ Burners, installation should be completed by a certified gas technician.

optional remote
CF-AI-R

- DSI System available to custom order on all Crystal Fire™ Burners
- Order for liquid propane (CF-DSI-LP) or natural gas (CF-DSI-NG)
- Flame sensing
- Simple ON/OFF operation
- Crystal Fire™ Burners with DSI System can be purchased individually to be used for custom-built projects
- Glass guard recommended to enhance flame and performance
- UL listed when used with Crystal Fire™ Burners
- Stainless Steel burner standard, burner can be color coated: Black, Pewter, Honey Glow Brown, Copper
- Includes control panel with ON/OFF switch
- Optional remote sold separately (A23 battery required)
- Optional 30 minute and 60 minute Timer Control Panels available

COMMERCIAL GRADE PRODUCTS

commercial grade products

We work with businesses, hotels, designers, builders, architects, and more to provide the best quality outdoor living products and indoor electric fireplaces.

commercial-grade electric fireplaces

Commercial-grade Gallery Collection Indoor Fireplaces by The Outdoor GreatRoom Company™ are a great, cost-effective, alternative to wood burning or gas fireplaces. Put in any commercial space for instant ambiance. These units are CSA tested for safety and require minimal installation— saving time and money. Perfect for multi-family residences, restaurants, hotels, office spaces, and more. Visit outdoorrooms.com/Commercial to get more information regarding our commercial services.

Model GE-94 at Paradise Landing
Restaurant, Balsam Lake, WI

commercial-grade outdoor products

Commercial-grade outdoor products by The Outdoor GreatRoom Company™ include gas burners, fire pit tables, fire features, and outdoor kitchens. Both standard and custom products can be outfitted for commercial spaces and include added safety features. All fire products use our UL listed Crystal Fire™ Burner. Perfect for multi-family residences, hotels, sports stadiums, restaurants, and more. We strive to deliver the best product for your commercial setting and professional customer service before, during, and after your commercial project. Visit outdoorrooms.com/Commercial to get more information regarding our commercial services.

Uptown Fire Pit Table at Hampton Inn Hotel
Williamsport, PA

Napa Valley Fire Pit Table at Watergate Hotel
Washington, D.C.

TEMPERED GLASS

Tempered glass is used for all glass wind guards and fire glass. It has been heat-treated and is safe to use with our Crystal Fire™ Burners. Untempered glass or glass that has not been heat treated can explode when it reaches high temperatures and is not safe to use with gas fire pit tables.

SUPERCAST

Supercast is a proprietary blend of fiber glass and concrete to provide durability and strength. It is stronger and weighs less than traditional concrete. We have a variety of standard colors and finish looks. Custom options available.

LAVA ROCK

Lava Rock is a naturally produced material and is an additional fire media that can be used in our Crystal Fire™ Burners.

GRANITE

Granite, a popular choice for its durability, strength, and beauty, is available as an option for several fire pit tables in both solid pieces and tiles.

STAINLESS STEEL

Crystal Fire™ Burners, outdoor kitchen accessories, and finish trims are made from #304 Stainless Steel. #304 Stainless Steel is a high quality, commercial grade metal.

RIP-STOP FABRIC

Polyester rip-stop laminated fabric is used for our fire pit table and fireplace covers. It is heavy duty, yet lightweight and will protect your investment from the outdoor elements. The material is one way breathable, which lets interior moisture evaporate out, while preventing exterior moisture from getting in.

FIBER CEMENT BOARD

Fiber cement board is used to build many of our fire pit tables, outdoor fireplaces, and custom outdoor kitchens. The board is non-combustible and resistant to mold and mildew which makes it ideal for outdoor applications.

STUCCO

Stucco is used on many of our outdoor products and comes in many colors and finishes. Stucco is a low maintenance and durable finish.

STEEL FRAMING

Steel framing is used to build many of our fire pit tables, outdoor fireplaces, and custom outdoor kitchens. The framing is G90 marine grade galvanized Stainless Steel that is rust resistant.

WOOD

Douglas Fir is used for the Sonoma and Lodge II pergolas. Architects and engineers consistently look to use Douglas Fir as a structural lumber for its dimensional stability and superior strength-to-weight ratio. Cedar is used for accents on several fire pit tables.

CRYSTAL FIRE™ BURNERS

Where can I use my Crystal Fire™ Burner?
These burners are used in all OGC outdoor fire pit tables and fire pits. These burners can be purchased separately as well as for your own DIY project.

Are these burners UL listed? What does that mean?
Yes all of our burners are UL tested and listed. This means they have passed numerous tests to ensure safe operation. They have undergone wind, rain, and clearance tests.

Are there different Crystal Fire™ Burner models?
We have a few different Crystal Fire™ Burners and over 50 Fire Pit Tables in stock. Many of these can be purchased as one complete unit or individual components. Custom fire pit tables & burners are also available. See the Crystal Fire™ Burner section of the catalog for a complete list of burners, sizes, colors, etc.

If I purchase a Crystal Fire™ Burner for my own project, what else is needed?
Depends on the project. More than likely you will need to purchase a standard control panel, key valve, timer, or automatic ignition; this will allow for easier access to operate your burner from the outside. You may also need to specify the fuel source (LP or NG) used if it is a large or custom burner. We recommend working with your local OGC dealer to determine what is needed for your project.

Is media included with the Crystal Fire™ Burners?
Yes, we include Clear Tempered Fire Glass Gems with each Crystal Fire™ Burner (some exceptions on DIY burners, custom burners, etc). The glass used is a heat-tempered, tumbled glass gem.

How many BTUs per hour are produced?
The BTU rating for each burner varies by size and fuel type. For exact BTU rating see page 31 or consult your burner manual.

Can I roast marshmallows on my Crystal Fire™ Burner?
Yes you can, however this appliance has UL Listed as a decorative gas appliance not a cooking appliance. Also make sure that combustible items do not end up on the burner top, as it will clog the burner ports and prevent a proper burn.

What type of fuels can I use?
You can choose from either LP – Liquid Propane, or NG – Natural Gas. The Crystal Fire™ Burner unit comes set-up for LP, however there is NG conversion kit that comes with the unit.

FIRE TABLES & FIRE PITS

Can I use my OGC fire table on a wood deck?
Yes, all OGC fire pits & fire tables are ok to use on a wood deck if clearances are met. OGC Crystal Fire™ Burners are UL tested and listed. These burners are used in all of our outdoor fire pits. They are ok to use on concrete patios, wood decks, composite decks, etc.

Can they operate on propane or natural gas?
Yes, they can be operated on either fuel source. The majority of our fire tables come set up for use with propane and do include a natural gas orifice that can be converted in the field. If converting to NG, a certified gas technician should do the installation. Some of our larger BTU burners and custom burners need to be specified for either LP or NG use. Please contact OGC for specific information.

When I push in the black sparker I don't hear any sound
Be sure to put in a AAA battery, + side facing out into the black sparker box. The push button can be unscrewed and the battery slid in. Connect the two wires running from the burner and you should hear the sparker and see a blue spark at the electrode.

Is media included with the fire tables?
Yes, we include Clear Tempered Fire Glass Gems with each Crystal Fire™ Burner (some exceptions on DIY burners, custom burners, etc). The glass used is a heat-tempered, tumbled glass gem.

Is a propane tank included with my fire table?
Propane tanks are not included with purchase.

How long will a 20 lb tank last?
Typically you can operate for an average of 8 hours when burning the CF-20 or CF-1224 on high. The CF-2424 & CF-1242 will vary depending on which orifice is used.

Do I need to cover my fire table when not in use?
It is not mandatory to cover the fire table. It is designed to allow moisture to flow down through the bowl and the unit is constructed of materials to withstand outdoor exposure, however we do recommend covering if not using for extended periods. This will prevent any unwanted debris from falling onto the burner bowl. There are optional protective covers available.

What happens when it rains?
If the fire table is uncovered, water will drain through the gas port holes in the burner, into the burner neck below, and out by the air shutter. Water will not build up in the burner, it will drain out the bottom.

PERGOLAS

Do I need to re-stain my pergola?
The wood is prefinished with stain containing UV inhibitors, which slows down fading. We suggest restaining as needed. Each wood piece is hand dipped into the stain allowing the stain to penetrate the wood.

Does it need to be fastened down?
All pergolas come with fastening devices and fastening is recommended. Pergolas that are not fastened are void of any warranty. See manual for suggested way to fasten to patio or deck.

Are there custom pergola options available?
No, we do not take custom pergola requests.

CUSTOM OUTDOOR KITCHENS

What is the design and ordering process?
Start by completing the custom outdoor kitchen request form from either our catalog or website. From here we will communicate throughout the process on pricing and revisions. The entire process can be completed in 6 weeks once everything is approved.

What type of grills can be built in?
Any grill that has the appropriate installation kit or specifications can be used. This includes gas, charcoal, wood, and pellet.

Can I order a custom finish to match my home?
Yes, you can also order the unit unfinished, and have it finished on-site to match your house and landscape by your local dealer, contractor, or landscaper.

What are the Outdoor Kitchens built from?
The structure begins with G90 (Marine Grade) galvanized framing. It is then wrapped in fiber cement board. From there it is either finished with maintenance-free stucco and Supercast counter tops, or left unfinished to be completed on-site.

What type of maintenance is required?
• Stucco Siding – Clean as needed
• Supercast Countertops – Re-seal annually or as needed
• Interior – Clean as needed

FURNITURE

How do I clean the fabric?
Most stains can be cleaned with mild soap and warm water. Blot the affected area and try to remove the stain with the cleaning mixture. For more detailed instructions, please visit www.sunbrella.com.

Do I need to store my cushions from the rain and/or winter?
The furniture is built to withstand a variety of weather conditions. You can choose to store them inside if you prefer that they are clean and dry to use.

Is the furniture rust-resistant?
Yes, due to the complete powder-coating process on the frames.

OUTDOOR FIREPLACES

What type of burner is in the fireplace?
The CF-1224 burner comes in every unit and is a UL listed burner. This includes both LP and NG orifices along with the clear glass gems. If desired, an optional log set and lava rock can be ordered.

Can I burn wood in any of these fireplaces?
No. These units are not wood burning fireplaces. The benefits of a gas fireplace include a smoke-free experience, turn on instantly, and provide instant heat.

Is the unit approved for use in screened porches, gazebos, and lanais?
The unit itself is not UL approved for this application, but there should not be any problem provided the following guidelines are followed:
• Minimum porch area: 96 square feet
• Minimum ceiling height: 92 inches
• Minimum of two walls must be screened
• Minimum top of screen height side walls: 6 ft. 8 in.
• Minimum screen area: 64 square feet

GALLERY INDOOR FIREPLACES

What is the cost to operate the electric fireplace units?
Based on the 2012 national average electricity costs, the cost to operate the flame and lights is less than one penny per hour. The cost to operate the heater is about 9 cents per hour on low and 18 cents per hour onhigh.

How much heat will the electric fireplaces put out?
The heat output on high is equivalent to 5,000 BTUs/hour (GBL-44 & GBL-64 up to 4500 BTUs/hr.)

Are the electric fireplace units quiet?
Yes. They have a lightweight composite shaft for the fan/blower making it very quiet.

How big of a room will the electric fireplaces heat?
While there are many factors to consider (insulation, outdoor temperatures, openness of the room, etc.), 5,000 BTUs should be adequate to heat a room that is about 10 x 20 feet (200 square feet) with an eight foot ceiling.

What happens if we leave the flame on the electric fireplaces?
The unit is under warranty for 10,000 hours (400 days +). There is a safety mechanism that prevents over heating if the heater is left on for extended periods. If you operate the fireplace for 4 hours a day the LED lights should last at least six years.

Do all of the units come with a full featured remote control?
Yes. The remote controls the flame setting, heat, and thermostat.

Can the electric fireplace units be installed in a bathroom?
Yes. It should be located away from a wet/splash zone and away from direct steam.

For more information visit outdoorrooms.com/support-faq/

With our Minnesota based customer service, design, engineering, and manufacturing abilities, we can help you to design, build, and deliver the custom project you've been dreaming up. The process is simple and includes steps to ensure we do everything correct.

- Start with something as basic as a sketch. It can be something completely new or simply a dimension or material change to one of the many items in our catalog
- Use one of the following forms provided, make a photocopy and fill out as completely as possible. The more information we have in advance the better.
- Outdoor GreatRoom will provide an estimate for the project.
- If the estimate is approved the Design and Engineering team will dedicate time and resources to the design.
- Once a rendered drawing is complete, OGC will submit that back for approval.
- Revisions can be discussed and made at this time.
- Once everything is approved a signed drawing and corresponding purchase order is submitted to OGC to start the process.

CUSTOM GLASS GUARD REQUEST FORM

Date_____/_____/_____

Company_____ Phone_____Fax_____

Customer Name_____

Email_____

Please provide drawing of your custom glass guard request:

Additional Notes:
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____

Drawing should include the overall shape & dimensions (LxWxH). Glass Guard drawn from multiple angles if possible. Feel free to attach separate sheet.

Glass Guard Height: ___6" ___8" ___10"___12"

Glass Guard Length: _____ (min. 10" – max. 66" per panel)

Glass Guard Width: _____ (min. 10" – max. 66" per panel)

- Glass is ¼" thick and has a polished edge
- Multiple panels will be required for sections longer than 66". Multiple glass clips apply as well.
- Corner clips add $^9/_{16}$" length to each end, 180° connections add ¼".
- Silicone bumpers add ¾" to overall height
- Glass etching available upon request

CUSTOM BURNER REQUEST FORM

Customer Name_____

Please provide drawing of your custom burner request either below or on a separate page:

Additional Notes:

_____
_____
_____
_____
_____
_____
_____

Drawing should include the overall shape. Burner drawn from multiple angles if possible, and all desired dimensions (LxWxH). Feel free to attach separate sheet.

Burner Shape: _____linear _____square _____round _____"L" shape _____other

If linear, OGC suggests : ___CF-1248 ___CF-1264 ___CF-1274 ___CF-1284 ___CF-1296 ____CF-12108 ____CF-12120

Overall Burner Dimensions: ____standard width (13 ½" overall) _____custom width (If not standard, what is the desired width? _____ Length

Ignition: ___Battery Spark Igniter ___Direct Spark Ignition
         IF BATTERY SPARK IGNITER: ___Push Button/Turn Knob ___Key Valve ___Timer (DSI Only)

Gas Type: ____LP ____Natural Gas (If natural gas what is the length of gas line? _____)

What is the estimated distance from middle of burner to control panel? _____ (standard groundwire/electrode leads are 18")

Material: ____Stainless Steel Finish _____Color Coated Burner (Circle One: Black, Honey Glow Brown, Pewter, Copper)

Mounting: ____Top Mount _____Recessed

Control Panel Type: ____Black (6.25x6.25") _____Brown (6.25x6.25") _____DIY Black (9.5" L x Expandable 3-4.5" H)

Safety Tested: ____Standard UL Listing _____UL Field Test ____ Not required to be UL listed

Fire Media: ___Glass Gems ___Lava Rock ___Log Set

Accessories: ___Glass Guard ___Glass Burner Cover ___Supercast Burner Cover

Anticipated Lead Time for Project_____

Estimated Budget_____

Additional Requests_____

*Linear/Rectangular burners must be a minimum of 13.5" wide and maximum of 10' long to maintain UL listing on single ignition control.
*Certified Gas Technician should be consulted on installation   *Flame height is 8-14"
*Burners are tested and designed at standardized pressure: 7 inch water column NG / 11 inch water column LP

CUSTOM FIRE PIT TABLE REQUEST FORM

Customer Name_____

Please provide drawing of your custom burner request either below or on a separate page:

Additional Notes:
